

SPCT120 "Green-Stat"

MODEL: SPCT120

7-Day Programmable Thermostat

Our SPCT digital programmable thermostat is the latest addition to our family of energy efficient evaporative cooler controls. This controller is designed exclusively to complement our Single Point Connection models. When coupled with our SPC option, the SPCT120 "Green-Stat" offers all the features of 7-day programming to our commercial line of coolers. The SPCT120 "Green-Stat" allows remote thermostatic control of up to 25-SPC units.

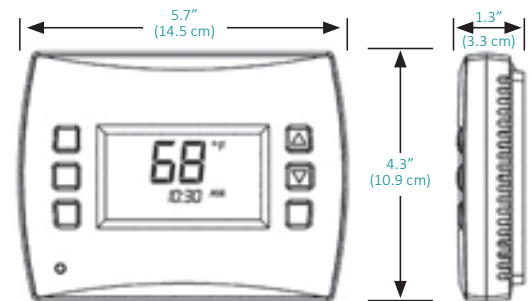

- Easy to install
- Provides a pad "Pre-Wet" & "Rinse" cycle
- Full 24/7 programmable capability
- 365 Day Programmable Calendar with 20 holidays & daylight-saving time shift
- Remote indoor sensor support
- Keypad lockout & PIN access
- Programmable & intermittent fan
- Large blue display for easy low-light viewing
- UL Listed
- 1 year warranty

Compatible with all SPC models

2-Piece kit includes:

Wall mountable thermostat & control box

CTP (Commercial Thermostat Package)

Compatible with all SPC models

Includes:

- SPCT "Green Stat"
- NEMA 4X rated junction box
- 1 year warranty

Models: CTP120 | CTP208
CTP240 | CTP480 | CTP200

Energy Efficient Control with Factory Wired Switch Box

The CTP (Commercial Thermostat Package) is Specifically designed to retrofit your existing PMI Industrial cooler with thermostatic control. The CTP includes a factory wired NEMA 4X rated junction box, and the SPCT "Green Stat" 7-Day Programmable thermostat.

- A switching package designed for retrofitting a commercial thermostat into an existing application
- Includes a 4 event, 24/7 fully programmable thermostat
- Thermostat provides a pad prewet and rinse cycle.
- Thermostat is UL listed
- Switch box is a NEMA 4X rated box
- Universal thermostat for switch box

SPECIALTY INDUSTRIAL COOLER ACCESSORIES

CSB (Commercial Switch Box)

The CSB (Commercial Switch Box) by PMI is a convenient solution that provides independent manual controls for both the pump and motor for your industrial air cooler. This field installed component has been factory tested and is fully compatible and ready to operate your PMI evaporative air cooler.

- Must be ordered voltage specific for your application from 120 volts, single phase to 480 volts, three-phase.
- Separate switches for independent control of the cooler motor and pump.
- Box is NEMA 4X rated.
- Box & components are UL listed
- For field installation only
- 1 year warranty
- Universal switch box
