

Shop Blaster

The ultimate storage
and cooling solution.

*Mechanic's Bays
Repair Centers
Oil Change Centers
Garages
Workshops
and more.*

KEEP YOUR COOL

with the industrial grade *Shop Blaster* workstation

This Storage / Cooling solution can be utilized anywhere professionals use tools to earn a living or spin a craft. The heavy duty Waterloo® 5 drawer toolbox is built to last, increase productivity and efficiency. Easily store, retrieve and organize professional tools and equipment while solving your cooling needs.

Storage & cooling solutions for your industry

flight bays
airplane hangers,
manufacturing areas,
maintenance areas,
open bay service shops,
garages,
tech & career schools,

Wherever hard-working professionals are using tools – in manufacturing, maintenance, vehicle repair and more – they're relying on the Shop Blaster to store, organize and secure the valuable investment they have in their tools.

They can also rely on the evaporative cooler to keep their environment cool and comfortable. Keep work areas and customer waiting areas up to 30 degrees F. cooler by using the effective & powerful evaporative air cooler. Studies by the Occupational Safety and Hazard Association (OSHA) show that worker productivity improves with cooler working environments.

Why choose the Shop Blaster work station?

The Shop Blaster cools anywhere that air conditioning is cost prohibitive. This evaporative cooling process pulls warm air through the wetted evaporative cooling pad reducing temperatures as much as 30°F.

This powerful ½ HP cooler is ruggedly

built and comes ready to operate right out of the box. Heavy duty casters give it mobility for hassle free spot cooling wherever you need it.

This unit includes a convenience outlet for charging any tool or phone on the spot. Not only does the unit

keep you cool, store your tools, and provide a charging port, it also can rock your world with sound. The stereo is MP3 compatible with both blue tooth compatibility and FM radio, or for your own music it has a USB port.
